

Community Collection

Did you know that electronic waste (e-waste) is one of the fastest-growing types of trash? In 2022, less than 25% of e-waste was properly recycled—a significant environmental concern. But here's something encouraging: for every 12 laptops we repair and reuse, we save enough energy to power an entire home for a year. Isn't that amazing?

That's why we organize community collection events to promote environmental sustainability in our local area.

These events are a great opportunity for everyone to get involved and make a meaningful impact. Businesses are welcome to join us in this effort too! CDR Global takes care of everything—from packaging to transportation—so you don't have to worry.

We ensure that all your electronic devices across the U.S. are responsibly recycled. Interested in participating? Please reach out to our procurement team today.

We're working to inspire more companies across our state and the country to take part in recycling initiatives. Together, we can build a better future for our environment. Check out the list of items you can bring to a collection event.
